

Armando Roque

Software Developer

Profile

Proven Full Stack Engineer with 10+ years of experience delivering high-impact web applications using React, Next.js, Angular, Node.js, and cloud services like AWS and Firebase. I've also built projects leveraging AI technologies, including LangChain and Ollama, integrating models like LLaMA 3 and OpenAI's GPT series. I'm an active member of the Hugging Face community, where I explore and contribute to the latest in open-source machine learning tools.

Employment History

Full Stack Engineer – Qualpay (2024–2025)

At Qualpay, I improved real-time reporting and reconciliation tools used by businesses to track payments. I optimized backend performance and streamlined frontend workflows for faster insights. My work helped reduce operational friction and improved data accuracy for merchants. It was a key contribution to a high-performance, enterprise-grade payment platform.

- Optimized real-time payment reporting tools to improve data accuracy and reduce operational friction.
- Enhanced backend performance and modernized Angular-based frontend using TypeScript.
- Maintained and extended APIs to support seamless financial reconciliation and reporting.

Senior Next.js Developer – Condoit (2023)

As a Senior Developer at Condoit, I spearheaded the development of a groundbreaking application that revolutionized administration, project management, user management, and subscription handling. Leveraging cutting-edge technologies such as Next.js (latest version) with the App Router, Stripe.js, Chakra UI, and Tanstack's Table and Query libraries, I single-handedly built the application from scratch.

- Led development of an admin and project management platform using Next.js, Chakra UI, and Stripe..
- Built end-to-end features for user roles, subscription management, and system integrations.
- Integrated TanStack Query & Table for performant, reactive data display.
- Deployed production-ready SaaS UI in under 3 months as a solo developer.

Skills

Languages

Senior React Developer – AnswersNow (2023)

Led the development of a dynamic web application for certified professionals, implementing real-time scheduling and payment processing. Built a responsive interface using React and TypeScript, integrated Stripe for payments, and optimized database performance with PostgreSQL.

- **Developed a real-time scheduling platform for certified professionals using React and TypeScript.**
- **Integrated Stripe for seamless and secure payment processing.**
- **Designed a responsive, accessible UI for desktop and mobile users.**
- **Optimized PostgreSQL queries and indexing, significantly improving backend performance.**
- **Collaborated cross-functionally to ensure HIPAA-compliant data handling and user workflows.**

Fullstack Developer – Various Companies (2013–2017)

Worked across several companies including Mercer, PartnerHero, and San Services delivering responsive UIs with React, Node.js, and Firebase.

- **Built CRM systems and real-time sales tracking dashboards.**
 - **Introduced reusable component systems in early React adoption.**
 - **Supported operator performance management via custom admin tools.**
-

Hobbies

Sports Enthusiast: Passionate about playing golf, padel, and volleyball.

Gaming: Enjoy video gaming in leisure time.

Tech & DIY Projects: Actively develop personal web app projects and builds tools, while tinkering with electronics to create a smarter, more connected home.

Education

B.Sc. in Computer Science – *Universidad Católica de Honduras*

2009 — 2016

Certifications

Advanced React – WesBos

ata Querying in React – [@uidotdev Certificate](#)
